

B. Sc. Zoology

Programme Specific Outcomes (PSOs)

With a three-year degree graduation in Zoology, you'll be able to build knowledge and abilities by means of ;

- PSO1:** *Developing skills* for the proper identification, naming and classification of life forms especially animals.
- PSO2:** *Knowledge acquisition* on structure, life cycle and life processes that exist among animal diversity through certain model organism studies.
- PSO3:** *Understanding of various interactions* that exist among plants, animals and microbes; by far developing the curiosity and interest on the dynamicity of nature.
- PSO4:** *Perception on the major elements of variation* that exist in the living world through comparative morphological and anatomical study.
- PSO5:** *Acquiring ability to explain the diversity and evolution* based on the empirical evidences in morphology, anatomy, embryology, physiology, biochemistry, molecular biology and life history.
- PSO6:** *Proficiency* in the observation and study of nature, biological techniques and scientific investigation.
- PSO7:** *Awareness about the scientific and technological advancements* in the fields of information and communication, biotechnology and molecular biology for advanced learning and research.
- PSO8:** *Internalisation of concept* regarding conservation and evolution through the spirit of inquiry.
